

The Science & Ethics of Three Person IVF

Andy Greenfield, Medical Research Council

Tuesday 8th March 7.30pm

Wallingford School Library, St George's Rd

Research into methods to prevent the transmission of mitochondrial disease began in 2005. Andy Greenfield will describe two of the techniques which were developed and will explain the rigorous processes involved before these techniques became legal in October 2015.

Join us at **Wallingford School Library**, above the Sixth Form Centre, on St George's Road, Wallingford, OX10 8HH. All meetings are FREE and very informal. They are aimed at non-specialists and there is always plenty of time for questions and refreshments. Doors open from 7:00pm.
