

Treating Autoimmune Disorders

Andrew Nesbitt, Field Medical Director, UCB

Tuesday 5th July 7.30pm

Wallingford School Library, St George's Rd

Good progress has been made with the treatment of autoimmune diseases such as rheumatoid arthritis and Crohn's disease. However, the response varies: some patients experiencing little curative effect and others suffering debilitating side-effects. The various approaches will be discussed along with possible solutions and improvements.

Join us at **Wallingford School Library**, above the Sixth Form Centre, on St George's Road, Wallingford, OX10 8HH. All meetings are FREE and very informal. They are aimed at non-specialists and there is always plenty of time for questions and refreshments. Doors open from 7:00pm.
