

Uncovering the Building Blocks of the Universe

Alan Barr, Department of Physics
University of Oxford

Tuesday 22nd November 7.30pm

Wallingford School Library, St George's Rd

The search to understand the basic constituents of matter has led scientists to build international collaborations and some of the largest scientific projects in the world. This talk will describe work at the **Large Hadron Collider** and discuss what it has already told us and what it might tell us in the future about the world around us.

Join us at **Wallingford School Library**, above the Sixth Form Centre, on St George's Road, Wallingford, OX10 8HH. All meetings are FREE and very informal. They are aimed at non-specialists and there is always plenty of time for questions and refreshments. Doors open from 7:00pm.
